UCHIDA YOKO GLOBAL CO.,LTD.

The best features of Uchida Foilglazer II

Laminating & Foil fusing in one box.

Foilglazer II is the compact and robust laminating & foil fusing machine. It accommodates papers up to 365x600mm in size. Ideal for laminating and embellishing digitally printed, short run jobs.

Easy setting, intuitive operation.

Foilglazer II has a feeder that can be unfolded. This makes film setting and regular maintenance easy. The touch screen control is very intuitive to operate.

Automatic air suction feeding.

Thanks to Uchida's air suction feeding technology, Foilglazer II can feed a wide variety of prints consistently. The feeder can take stocks from 110gsm to 400gsm in weight.

Enhance your productivity.

The maximum driving speed of the Foilglazer II is 5m/min. Thanks with the automatic film cutting mechanism, operator can walk away once the machine is started.

Perfect laminating on digital prints.

Foilglazer II takes a variety of laminating films commonly used in the markets, including films for digital print, soft touch films and anti-scuff films.

On-demand foil fusing.

Using gold/silver foil rolls, the machine can "foilglaze" (foil fusing) on black toners. This is an ideal way to add values on digital, short-run, on-demand applications.
